

ChemoGard BVB

ADVANCED BREATHABLE PROTECTION FOR CHEMOTHERAPY DRUG HANDLING

The next generation of breathable protective fabrics for chemotherapy drug handling.

Designed for clinical, laboratory, and operating room environments.

AI-assisted visual. Product representation reviewed for accuracy.

Clinical and lab environment protection against a wide variety of chemicals and potent chemotherapy drugs.

WHY ChemoGard BVB?

Lightweight, Breathable Tri-Laminate Fabric

Designed for protection and wearer comfort.

AAMI Level 4 Viral Barrier Protection

For high-risk clinical apparel applications

Chemotherapy Drug Resistance

Protections against selected chemotherapy drugs

Enhanced Wearer Comfort

With breathable performance

PFAS-free Construction

Constructed without intentionally added PFAS to support evolving product requirements.

Product Details

ASTM D6978

tested in accordance with chemotherapy permeation standards

UP TO 240 MINUTES

protection against hazardous chemotherapy drugs such as Carmustine

LOW LINT

construction for clinical environments

ULTIMATE PROTECTION FOR OPERATING ROOM, CLINICAL, AND LABORATORY ENVIRONMENTS

Feature	ChemoGard BVB
Construction	Tri-laminate
Breathability	Breathable, lightweight and comfortable
Protection Focus	Viral resistant (AAMI Level 4) + chemotherapy drug protection
Permeation Testing Standard	ASTM D6978
Chemotherapy Drug Testing	Protection up to 240 minutes against hazardous chemotherapy drugs such as Carmustine
Lint	Low lint

Expanding Protection Options

ChemoGard BVB expands Ahlstrom's portfolio of protective apparel fabrics by combining breathable comfort, AAMI Level 4 viral barrier protection, and chemotherapy drug resistance in a lightweight trilaminate construction. The fabric also features low lint construction for clinical environments and construction without intentionally added PFAS to support evolving product requirements.
